

Do you believe in Magic?

Do you have a health condition nobody knows what it is? Would you like to feel better. Twenty years ago out of desperation I tried Homeopathy and it worked for me. Over the past ten years I've witnessed amazing results from this 200 year old European health care system.

According to the WHO (World Health Organization), homeopathy is the second most utilized form of medicine in the world. Cultural heroes like Mark Twain, Gandhi, and the Royal Family in the United Kingdom have been advocates for this method of healing.

Classical Homeopathy is most beneficial for chronic, long standing conditions that have not gotten better by other forms of treatment. Some of the problems that have been helped by homeopathy are chronic fatigue, fibromyalgia, menopausal symptoms, arthritis, skin problems, hypertension--and just not feeling right.

I recently saw a man for a cough he had for months that would not go away. After our initial consultation and taking his remedy, his cough disappeared in a couple of weeks. During the follow up appointment a month later, he was surprised that beside his cough disappearing he had more energy, he wasn't pushing himself the way he had in the past, and his overall mood was better. His response to constitutional homeopathy is quite common. Since homeopathy is holistic it works at a deep level at the root cause of imbalance to restore a person to a state of optimal health.

The goal of classical homeopathy is to retune one's life force so you can fully pursue your unique purpose in life--by stimulating one's body to heal itself. After successful treatment I've noticed that people often make improvements in all areas of their life—career, relationships, and spiritual development.

Some people think homeopathy is simply the placebo effect. Tell that to infants who've been relieved of colic, cattle cured of mastitis, and used-to-be skeptics like myself who've had life-changing results from this elegant, subtle, yet powerful system of healing.

As Mahatma Gandhi once said "...homeopathy cures a larger percentage of cases than any other method of treatment and is beyond all doubt safer, more economical, and the most complete medical science."
